I expected to have a disadvantage compared to others who have done cybersecurity longer than I have, but I still wanted to see how far I could get with my limited experience. I am surprised and proud that I'm able to achieve this much despite not having a background in computer science or cybersecurity.

Angela, Atholton High School

After participating in this competition, I have decided to seriously consider a career in cybersecurity. While I'm still not sure what area of cybersecurity I would like to study, I do know that I find this topic interesting and engaging, and that I would enjoy a career in cybersecurity.

Fiona, Home Schooled

It was great! This is my first time participating in the National Cyber Scholarship Competition, and truly, any cybersecurity competition in general. This competition and the journey up until this competition made me realize my passion for cybersecurity and also makes me want to pursue cybersecurity in the future.

Ritviik, Poolesville High School

Maryland's WORKFORCE SYSTEM

Benchmarks of Success – Data and Dashboard Committee Quarterly Data Review

Data and Dashboard Committee

The Benchmarks of Success for Maryland's Workforce System is a framework used by Maryland workforce development system partners to build system effectiveness, support transparency about progress, and help State and local WIOA partners align resources and strategies with its intentions.

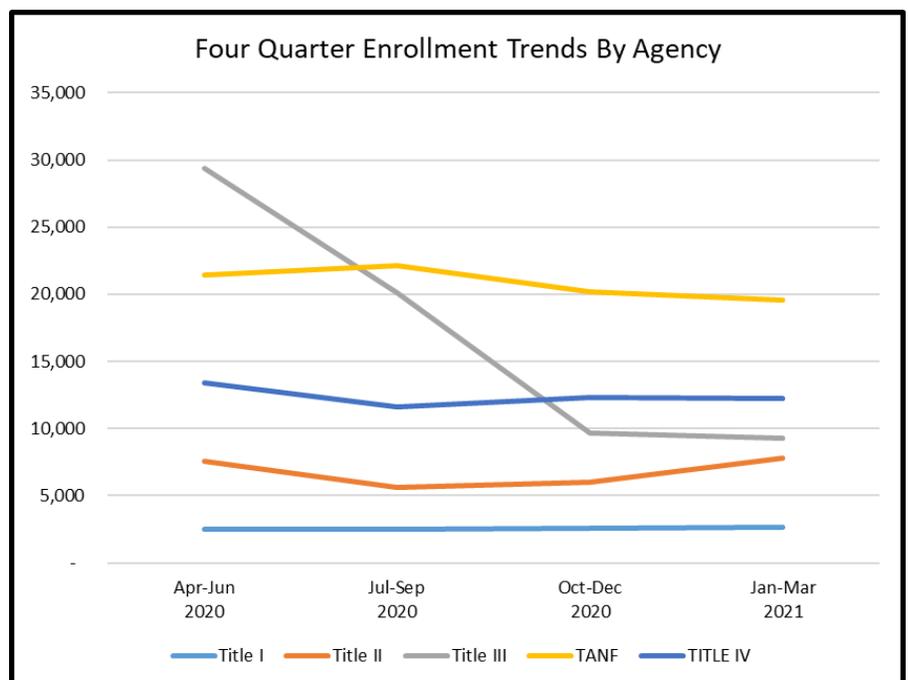

This Quarterly Data Review is a snapshot of the current state of Maryland's Workforce System. It contains data from the following agencies:

- MD Department of Labor
 - Titles I – Adult, Dislocated Worker, and Youth
 - Title II – Adult Education & Literacy
 - Title III – Wagner-Peyser
- MD Department of Human Services: Temporary Assistance for Needy Families (TANF)
- MD Division of Rehabilitation Services: Title IV – Vocational Rehabilitation
